

NinjaTrader Version 7.0.0.12 Beta Release 12 - March 24 , 2010

Status	Issue #	Category	Comments
Changed	3564	RemoteSoft Protector	Reverted back to RemoteSoft Protector V3 !! Please see notes in email announcement regarding implications
Fixed	3541	Charts	Pivots and WoodiesPivots indicators could calculate pivots wrong on defined combination of session definition and time zones.
Fixed	3544	General	NT now can handle negative realtime data.
Fixed	3545	Charts	Reloading bars data could set auto scale of indicator to true on multi-series charts when other than default session template was applied.
Fixed	3546	Charts	Bar series and indicators could be selected on different than containing panel
Fixed	3547	Charts	Price labels of indicators with "Calculate on bar close" set to true could be off 1 bar on non equidistant charts. Price labels showed up in wrong color on penultimate bar
Fixed	3548	Charts	Indicator error messages in log could appear when realtime chart containing indicators and strategies chart was closed.
Fixed	3549	Charts	Timestamp of daily bars on chart didn't always reflect the session end of the last to that daily bar associated intra-day session.
Fixed	3550	Strategy Analyzer	Trades in Strategy Analyzer on a daily chart were placed on wrong bar index
Fixed	3551	Market Replay	Crash when reversing an ATM with a shadow strategy
Fixed	3552	Workspaces	Restoring workspaces containing multi series chart with indicators on several series could throw exception in indicators.
Fixed	3553	Charts	Bars series for actual date could have wrong merge offset when session beginning on pre-day(s) and today is rollover date of the requested instrument
Fixed	3554	Strategy Analyzer	Right click on Instrument/Optimizer/WalkForward grid->Save had set some fixed timestamps and not the actual timestamp.
Fixed	3555	Hot Key Manager	Hot Key Manager could crash when trying to remove a hot key on a collapsed group.
Fixed	3557	Session Manager	Calculation of time when contracts roll could be wrong, leading to gaps or missing sessions in data.
Fixed	3558	Basic Entry	+/- buttons would no longer work after pressing them multiple times rapidly.
Fixed	3559	Strategies grid	Right click->Edit strategy->Cancel did change strategy settings regardless.
Fixed	3560	Charts	Disabling/enabling strategies did not properly live orders attached to the prior instance of the strategy which resulted in syncing issues on the new strategy instance.
Fixed	3561	Historical Data Manager	If all data rows for one node were 'excluded', changes weren't saved, so data was still there.
Fixed	3562	MBT adapter	Requests for daily historical data could yield error 26.
Fixed	3563	Market Replay	Panel height ratio were reset on moving slider
