

NinjaTrader Version 7.0.0.13 Beta Release 13 - March 31 , 2010

Status	Issue #	Category	Comments
Fixed	3566	MBT adapter	Requests for tick data could yield error 26.
Fixed	3567	C2 adapter	C2 adapter did not work properly.
Fixed	3569	Market Replay	Resolved inconsistency on handling accounts for NS strategies
Fixed	3570	General	Resolved "AssemblyResolveEvent handlers cannot return Assemblies loaded for reflection only" issue.
Fixed	3571	Time And Sales	T&S window did not persist the columns settings
Fixed	3572	Chart Trader	There could be rare conditions after minimizing/maximizing Chart Trader where PnL had not been shown although "Show PnL when flat" was set.
Fixed	3573	Executions tab	Right click->Add execution would throw assert as the license was a sim license.
Fixed	3574	ZenFire adapter	Filter "invalid" trades (like they happened on EUREX recently)
Fixed	3575	Charts	On charts there could be a gap in data on session before last day's session.
Fixed	3576	Historical Data Manager	User could not save modification after removing last exclusion from HDM.
Fixed	3577	Strategy Analyzer	Bar series dialog in toolbar was not disabled in SA
Fixed	3578	Strategy Performance window	Strategy performance window was left disabled after pressing 'no' on question, if window should be closed on removing strategy from chart.
Fixed	3579	Strategy Analyzer	SA could crash when chart open after back test, and user changes instruments (clicks instruments in tree view) in rapid succession.
Fixed	3580	Market Replay	Clicking on chart canvas after rewind on MR is triggered could crash NT.
Fixed	3581	Charts	V value of anchors of chart objects could change when property dialog was opened.
Fixed	3582	Strategy Analyzer	The tab sequence summary->chart->summary->chart would make custom color series ineffective
Fixed	3583	NinjaScript strategies	Signal handling etc. still could have been triggered on live incoming executions although Unmanaged=true.
Fixed	3584	NinjaScript strategies	NS strategies did not properly recover their live orders on restoring after NT restart which caused several issues in syncing when re-enabling.
Fixed	3585	TDA adapter	Updated to latest TDA API V130
Fixed	3586	TDA adapter	Changed logic on requesting historical daily data to resolve issues related to incorrect from/to dates.
Fixed	3587	Strategies grid	Strategy in Strategies grid could have had the Enabled check box be displayed as "Disabled" despite it actually being "Enabled"
