Maybe I should readjust and close out every time I'm up by 1,000... Have a feeling that staying for this last bit is going to not have the right risk to reward ratio. Granted I will Lock in a solid gain should I get taken out, but it is a RISK to Reward from what I gained of almost 1 to 1 for my target of 1823... Actually I am risking more than 1 to 1. A bit late now... In for the full ride. Off to run some errands. Put my target and stop in as OCO orders and will be out of the market either way. I SHOULDDA stayed, but I'm gonna go. Trust in computer and the FORCE. ;-)
