awxEconomicNews Installation and Configuration Guide In a Nutshell Installation Configuration What would you like to see? Color me Beautiful See it Clearly Only Interested in News for Specific Countries?

In a Nutshell

The awxEconomicNews indicator shows the current day's economic news on your trading chart. It allows you to select the news items you are interested in seeing, and configure the fonts and colors you want to use for your news feed. The feed synchronises once a day to ensure that you have the latest news at your fingertips.

Installation

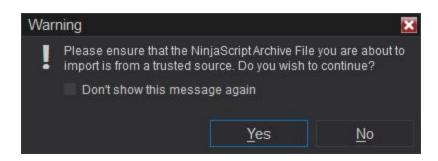

To install the indicator in Ninjatrader 8, click on the Tools->Import-Ninja Script... menu item in the Ninjatrader 8 Control Center.

NINJA TRA Strategy	DER		¥	Tools D Workspaces Instruments Instrument Lists	Ÿ	Connections Q Help Position	
				Database Management Hot Keys Historical Data Commissions Risk Trading Hours			
Orders E	xecutions	Strategies		Import Export Remove NinjaScript Assembly	•	Backup File Historical Data Ninja Script	
			~	Global Simulation Mode Options		Stock Symbol List	

Next navigate to the location where you saved the .zip file for the indicator, select the file and click the Open button.

What would you like to see?

The news feed shows items with different market impacts in one glance. You can choose which items you would like to see by checking the different types in the "1. Items To Show" section on or off. It is recommended that you leave the "Show Errors" check box on in case any errors occur while retrieving news items.

Color me Beautiful

The indicator was written in such a way that you have full control over the way you want to see your news feed. The color section allows you to choose the colors that makes the most sense to you and will get your attention for the news items you want to see. You can change any of the item colors by clicking on the drop down box for the item you want to change and choosing any of the available colors.

See it Clearly

You can choose the fonts that you would like to use to display your items and news header in the "3. Font and Alignment" section of the indicator configuration. Just a note, fixed width fonts like the default configured Consolas font work the best for the clearest results. To change any of the fonts, click the down arrow next to the item you want to change and choose your font and font style.

Only Interested in News for Specific Countries?

This section of the indicator allows you to configure which countries you are interested in seeing news for. The default list contains all the countries (their currency codes) that news is available for. If you want to change the list and limit it to certain countries, simply remove the ones you are not interested in. Please ensure that you keep commas between the different codes with no spaces in between.
