2/15/19	Plan:	1/8R = 25t. Start with 20/23/25. HTF use 20/26/56.									
	Result:	1 sided bull. See separate GOB log for this day. Bears got some small scalps.									
	Day:	Small gap up open, reversed at the YH gap closure. HTF bull acceleration. Dailies: wedge breaks out bullish and makes 100% quickly.									
	Notes:	The bull CLs are a 3w HTF and a G bull chan 200% that intersected and were reasonbly parallel at the bell.									
	8:24	HTF 237%	S	20	23	56		0	L		
	8:27	YH	S	20	23	25	49	0	L		
	8:30	HTF 250%, G bull CL 100	S	20					C	29	Sloppy Cowboy. Was looking for a DFA. Should have just taken the HTF 1/8.
L*	8:34	YH	B	20	23	25	13	189	W		The aggressive gap closure.
	8:45	YR 137%	S	20	23	25	10	50	W		Begins a wheeling around both bull CL. Don't wanna be short again.
	8:50	YR 125%, GH	B	20	23	25	25	0	L		Looked good for a BOPB, but 20t risk was too light. 25t not enough either, so wait.
											a 27t stop gets on board the bull.
	8:52	YR 112%	B	20	23	25	0	164	W*		*if 1t in front.
	9:03	YR 137%	S	20	23	25		19	L		not appealing. The CLs are supporting. My TF misses the std tgt.
											Went 19t MAE, then a 5m LL at the PB to this price. 2m run up.
	9:26	YR 150%	S	20	23	25		13	L		LTF gets paid.
	9:31	HTF 262%	S	20	54	56		7	L		Bumping up the HTF tgt for a full move. Should have also bumped the stop.
	9:43	YR 162%	S	20	26	25	0	25	W*		* probable fill. 1 of 2 touches sets off 25t sideways.
	9:50	HTF 262% BOPB	B	20	54	56	2	50	W		1st mouse gets tested after this MFE.
	9:56	YR 162%	S	20	26	25	17	31	W		A decent short per the plan.
	10:12	HTF 262% BOPB	B	20	54	56	8	87	W		2nd mouse, but 1st distinct PB after establishing well above the bull CLs.
	10:14	YR 150% BOPB	B	20	26	25	6	89	W		Nice 1m H2. Missed it. I have to work on these. See journal.
	10:32	HTF 275%	S	20	54	56	30	22	L	1	4t MAE before scratching. Vocally expressive after scratching.
		HTF bull chan 125%	S	20	54	101	30	22	L		same price as above but RFE is to CLPB.
H*	11:17	YR 187%	S	20	26	25	14		W		Had to wait out 1h 45m of sideways for it to BD.
