NinjaTrader Version 7.0.0.8 Beta Release 8 - February 2nd, 2010

Status	Issue #	Category	Comments
Added	3414	NinjaScript	Introduce an "OnStartUp" method which is called after Initialize() but before any other event method call
Fixed	3396	ATM Strategies	ATM strategies with no live orders had been recovered inadvertently.
Fixed	3397	Hot Key Manager	Hot Key Manager still accepted CTRL+O/Z/A is typed in.
Fixed	3398	Market Replay	Strategies tab only should have "Replay101" selectable when connected to replay
Fixed	3399	Charts	Reset in chart properties wasn't working properly
Fixed	3400	Charts	Chart didn't scale to horizontal lines with AutoScale = true
Fixed	3401	NinjaScript indicators	FirstTickOfBar logic was broken.
Fixed	3402	Strategy Analyzer	SA had incorrect short cut for Right click->Edit
Fixed	3403	General	Internal bars storing logic could be off on first bar of 16 bars group when smallest difference of incoming prices are smaller than tick size.
Fixed	3404	Market Analyzer	Applying a template with TotalRowEnabled to an MA where already has TotalRow enabled would throw an error.
Fixed	3405	Market Analyzer	Row positioning could be off when pressing F5 while blank rows had been on the MA.
Fixed	3406	Charts	Intra day charts with sessions reaching over midnight build first bars of rollover date (futures & sessions merge back adjusted) or split/dividend adjusted value change date (stocks & split and/or dividend adjust setting) wrong.
Fixed	3407	Chart Trader	Chart Trader context menu was only working properly when bar series was on first panel
Fixed	3408	NinjaScript strategies	SubmitLive could submit exit orders with the same OCO ID. Now the strategy ID is attached to make the OCO ID unique.
Fixed	3409	Charts	Price label for historical bar series wasn't painted for most bar types.
Fixed	3411	PFG adapter	Filter fills starting with "BACKUP"
Fixed	3412	NinjaScript	Duplicate bars series now should work as expected.
Fixed	3413	FX Pro	FXPro could end up having live account selected even when in global sim mode by connecting/disconnecting multiple connections at a time.
Fixed	3415	NinjaScript indicators	Having a multi-series indicator as input of an indicator could cause log errors e.g. on pressing F5.
Fixed	3416	Charts	Opening chart object dialog could crash NT when object had y anchor value of > 99999 or < -99999
